

Get Back into the Swing of Things

A Brand-New Knee or Hip Can Change Your Life

Don't let unbearable joint pain keep you from the active life you deserve. If your pain is limiting your ability to climb stairs, get into your car or perform other everyday activities, joint replacement surgery might be the best decision you will ever make.

During an evening of presentations and Q&As, Robert J. Daley, MD and Scott A. Seymour, MD will reveal how high precision robotic and 3-D modeling systems such as Mako® have revolutionized joint replacement surgery in recent years – delivering more natural-feeling joints with significantly less pain and faster recovery times. You will go home understanding what to expect from your AMITA Health surgical experience, how to prepare and how quickly you'll recover.

Tuesday, November 19, 2019

6 pm check-in
6:30 pm presentation

AMITA Health Adventist Medical Center La Grange

5101 S. Willow Rd., Dixon B
La Grange, IL 60525
